The Applicant's remarks have been considered. The Applicant apparently asserts that "mechanical elasticity" is the equivalent of stretch or elongation modulus of elasticity. The word "elasticity" is defined as "[t]he tendency of a body to return to its original size or shape, after having been stretched, compressed, or deformed" (*The Wordsworth Dictionary of Science & Technology*, 1995), and there are various types of elasticity, such as elasticity of bulk, elasticity of elongation, and elasticity of shear, along with various types of elastic *moduli*. Neither of the references cited by the Applicant provides a definition of the term "mechanical elasticity" consistent with the use of said term in the present claims, and the Applicant has not provided any evidence that a person of ordinary skill would have understood, at the time of the instant invention, that the original disclosure *requires* that "mechanical elasticity" be equated with *stretch or elongation modulus* of elasticity (*Hyatt v. Boone*, 146 F.3d 1348, 1353, 47 USPQ2d 1128, 1131 (Fed Cir. 1998); MPEP 2163). The Applicant's specification repeatedly refers to a "compressive modulus" (e.g., paragraph 0054), but "stretch modulus" or "elongation modulus" is nowhere to be found in the original disclosure.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-29 and 34-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "mechanical elasticity" renders the claims vague, indefinite, and confusing as to the scope, as explained above (MPEP 2111.01). Likewise, "mechanical ultimate strength" (claim 3, line 2) and "elasticity" (claim 23, line 2) are vague and indefinite.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
